Review

Cellular mechanisms of antigen processing and the function of class I and II major histocompatibility complex molecules

C.V. Harding and E.R. Unanue

Articles

Transforming growth factor α and a PC12-derived growth factor induce neurites in PC12 cells and enhance the survival of embryonic brain neurons

M. Zhang, D.D.L. Woo, and B.D. Howard

Evidence for protein dephosphorylation as a permissive step in GTP-γ-S-induced exocytosis from permeabilized mast cells

Y. Churcher, J.J.M. Kramer, and B.D. Gomperts

The order of processing events in mouse mammary tumor virus envelope protein maturation: implications for the location of the glucocorticoid-regulated step

J.L. Corey and M.R. Stallcup

H-ras^12 induces cytoplasmic but not nuclear events of the cell cycle in small *Xenopus* oocytes

A.D. Johnson, R.J. Cork, M.A. Williams, K.R. Robinson, and L.D. Smith

On the cover: the illustration depicts the central theme of CELL REGULATION. Design by Patrick Maddux, San Diego, California.
