Paper of the Year Award

Each year, Molecular Biology of the Cell sponsors the MBC Paper of the Year Award. The winner of the award is the first author, who must be a student or postdoc of the paper judged by the Editorial Board to be the best among those published from July to June of each year. The winner will then be a speaker in an appropriate minisymposium at the next ASCB Annual Meeting. The award pays travel expenses for the winner to attend the Annual Meeting.

Papers are currently being considered for the third MBC Paper of the Year Award, the winner of which will be featured at the ASCB meeting in San Francisco, December 10-14, 1994.

Submit papers to: MBC Managing Editor, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814-3992. Phone: (301) 530-7153; Fax: (301) 571-8304.
Now You Can Add Molecular Level Imaging To Your Inverted Optical Microscope

You don't hear about major advances in established scientific techniques very often. But that's exactly what Explorer LifeSciences SPM™ means to cell and molecular biologists...the high-resolution, three-dimensional imaging of a scanning probe microscope combined with the capability and familiarity of an inverted optical microscope.

Add an Explorer LifeSciences SPM head and baseplate adapter to almost any inverted optical microscope...Zeiss, Nikon, Olympus and more. Visually position the SPM probe over the sample precisely where you want it. Now you're ready to produce images with lateral definition and quantitative height information at molecular resolution. Images of unparalleled accuracy made under true physiological conditions with as little as 50μl of solution. And you'll be able to monitor the integrity of your sample with your inverted optical microscope the entire time you're scanning.

But great images aren't all you'll get with Explorer LifeSciences SPM. For example, its the only SPM with One-Pass Imaging™. That gives you up to eight channels of data simultaneously over scan areas to 130μm square and 12μm in the Z range.

To learn just how easy it is to add SPM capability to your laboratory, call us today at 1-800-765-5067. Just tell us which inverted optical microscope you have and we'll have product information on it's way to you fast.

The four images of polytene chromosome clusters show visual positioning of the SPM probe tip (A); an optical microscope image (B); a 100μm atomic force microscope (AFM) image (C); a 50μm AFM image showing bands and interbands (D).

Explorer, Explorer LifeSciences SPM and One-Pass Imaging are trademarks of TopoMetrix. Other trademarks and registered trademarks are the property of their respective owners.
Monoclonal Anti-MEK1

MEK (MAP kinase or ERK Kinase) is also known as MAP kinase kinase (MAPKK). MEK1 is a dual tyrosine/threonine kinase that phosphorylates and activates MAP kinase (ERK1 and ERK2).\(^1\) It has been shown that MEK1 is phosphorylated and activated by several serine/threonine kinases, these include: c-ras1, v-ras1, c-Mos, and MEKK. MEKK shares homology with yeast kinases Ste11 and ayr2. It appears that MEK is activated via 2 different pathways.\(^2\) MEK1 differs from MEK2 in the amino terminal region and between the conserved kinase subdomains 9 and 10.\(^3\) This antibody is specific for MEK1 and does not cross react with MEK2. It reacts with MEK1 protein from human, mouse, rat, and xenopus on immunoblots. MEK activity can be immunoprecipitated and assayed using inactive GST:ERK1 as a substrate.\(^4\)

3. Devul, B.K. et al.; MEK2 is a kinase related to MEK1 and is differentially expressed in murine tissues (In Press).

Excellent for:
- Western Blots
- Immunoprecipitation of active enzyme activity

Catalog #13-3500
Purified
100 μg

Next day delivery!

ALSO AVAILABLE:
- PY20 anti-Phosphotyrosine
- Mouse anti-MAP Kinase
- Mouse anti-EGFr
- Protein A-Agarose
- Anti-Mouse Agarose
- Immunoblot kits
- Secondary antibody

Significance with Rigor and Craftsmanship in Experimental Science

Molecular Biology of the Cell

Owned and published by The American Society for Cell Biology

The monthly scientific journal dedicated to:

- an interdisciplinary approach to molecular aspects of cell biology
- publication of complete, scholarly papers without arbitrary page limit
- review and editing of every paper by scientists

Biological Cultures from ATCC

The ATCC is a private, non-profit organization that provides well characterized cultures to customers around the world for use in research, industry, medicine, and education.

CULTURE CATALOGUES

- Algae & Protozoa
- Bacteria & Bacteriophage
- Cell Lines & Hybridomas
- Filamentous Fungi
- Yeasts
- ATCC/NIH Human & Mouse DNA Probes & Libraries
- Recombinant DNA Materials
- Animal Viruses/Antisera, Chlamydiae, and Rickettsiae
- Plant Viruses/Antisera

ATCC Catalogues are available in print and diskette formats or online via Internet.

Statement of Ownership, Management, and Circulation

Prepared for the Biweekly Issues of The Journal of Cell Biology

The owner of this publication is the American Society for Cell Biology.

Publisher: ATCC, 12301 Parklawn Dr., Rockville, MD 20852

Number of issues published annually: 26

Annual subscription price: $80.00 for United States and Canada; $130.00 for all other countries.

Average number of copies per issue: 2,500

Number of copies printed for circulation: 2,500

Average number of copies on hand at beginning of year: 0

Average number of copies on hand at end of year: 0

Copies not available for sale: 0

Copies not printed: 0

Sales through dealers and carriers: 0

Sales to subscribers: 2,500

Total number of copies distributed: 2,500

Sales to non subscribers: 0

Change of Address:

Name of subscription agency: ATCC

Address: 12301 Parklawn Dr., Rockville, MD 20852

Title: The Journal of Cell Biology

Frequency of issue: Biweekly

Statement of Ownership

1. Title of publication: The Journal of Cell Biology

2. Date of filing: 1990

3. Place of publication: Rockville, MD

4. Publisher: ATCC

5. Owner: American Society for Cell Biology

6. Subscription price: $80.00 for United States and Canada; $130.00 for all other countries.

7. Known bondholders, mortgagees, and other security holders, directly or indirectly owning or holding 1% or more of total amount of bonds, mortgages, or other securities: None

8. Number of copies printed: 2,500

9. Number of copies distributed: 2,500

10. Copies not available for sale: 0

11. Copies not printed: 0

12. Total number of copies distributed: 2,500

13. Sales to non subscribers: 0

14. Sales through dealers and carriers: 0
