Paper of the Year Award

Each year, Molecular Biology of the Cell sponsors the MBC Paper of the Year Award. The winner of the award is the first author, who must be a student or postdoc of the paper judged by the Editorial Board to be the best among those published from July to June of each year. The winner will then be a speaker in an appropriate minisymposium at the next ASCB Annual Meeting. The award pays travel expenses for the winner to attend the Annual Meeting.

Papers are currently being considered for the third MBC Paper of the Year Award, the winner of which will be featured at the ASCB meeting in San Francisco, December 10-14, 1994.

Submit papers to: MBC Managing Editor, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814-3992. Phone: (301) 530-7153; Fax: (301) 571-8304.
Keeping readers at the forefront of this rapidly advancing field

THE AMERICAN JOURNAL OF

HUMAN GENETICS

Published monthly for the American Society of Human Genetics by the University of Chicago Press

Since 1948 The American Journal of Human Genetics has provided an authoritative record of research and review relating to human heredity. The Journal focuses on applications of genetic principles in medicine, psychology, physical anthropology, and social services and on relevant areas of molecular and cell biology. Your annual subscription to AJHG, including approx. 2,300 pages, features

- original research articles, all peer-reviewed, most appearing 11-13 weeks after final acceptance
- critical commentaries, review articles, and book reviews
- a quarterly section on Human Genetics Education, including reports on instructional innovations and reviews of teaching materials
- announcements of conferences and employment/fellowship opportunities

Researchers and clinicians in the biomedical sciences will find in AJHG the rapid progress and scientific rigor that characterize this field.

Editor: Peter H. Byers, M.D., University of Washington, Seattle

One-year subscription rates: Nonmember individuals and institutions $275.00. Student subscriptions available only as members of the American Society of Human Genetics (See below). Outside USA add $24 for surface postage. Subscriptions entered on a calendar-year basis only. Visa and MasterCard payments accepted. To order send check, purchase order, or complete credit card information to The University of Chicago Press, Journals Division, Dept. SF4FA, P.O. Box 37005, Chicago, IL 60637.

American Society of Human Genetics: Membership in the society includes a subscription to AJHG. For membership information, please write to the American Society of Human Genetics, Administrative Office, 9650 Rockville Pike, Bethesda, MD 20814.
Get to the core of the latest research in cell physiology.

The American Journal of Physiology: Cell Physiology presents superior reporting of exciting new scientific findings in the field. It is published by the American Physiological Society, the leading organization covering the full spectrum of physiology. Each year, AJP: Cell Physiology brings you approximately 400 articles encompassing 3,350 pages that include:

- Original, innovative work about normal and abnormal cell functions of essential interest to physiologists, cell biologists, biochemists, and biophysicists.

- Thought-provoking, stringently reviewed papers on the structure and function of cell membranes, contractile systems, and cellular organelles, as well as mechanisms of development, cell-to-cell interaction, gene expression, and neural, endocrine, and metabolic control of physiologically important functions.

- Relevant research reports from related fields such as biochemistry, biophysics, molecular biology, cell biology, and immunology.

Plus... Rapid Communications and Invited Reviews in every issue.

Don't pass up your opportunity to stay at the forefront of primary research in cell physiology. Subscribe today!

☑ Yes! I want to stay on top of advances in cell physiology. Please begin my 1994 subscription to the American Journal of Physiology: Cell Physiology immediately.

Your subscription will start with the January 1994 issue and you will receive 12 issues in 1994.

Maryland residents add 5% sales tax, or provide tax exempt ID#.

Canadian residents add 7% GST.

All subscriptions must be paid in advance in U.S. dollars. Foreign payments must be made in U.S. dollars, drawn on a U.S. bank located within the continental United States or charged to MasterCard or VISA.

Send your order or manuscript to:
The American Physiological Society

Topnotch research, fast publication

MOLECULAR ENDOCRINOLOGY

Editor-in-Chief: Anthony R. Means, Ph.D.

Molecular Endocrinology brings readers truly the latest research, maintaining a four-month schedule from receipt of manuscript to publication. This exciting recent addition to the literature (Volume 7 in 1993) is already a leader in the field of molecular endocrinology. Interdisciplinary in focus, Molecular Endocrinology features the best and most current peer-reviewed articles on the effects of hormones and related substances on the molecular biology and genetic regulation of nonprimate and primate cells. Articles published here are based on research that uses the techniques and methods of molecular research, recombinant DNA, protein structure, and membrane structure.

Molecular Endocrinology currently occupies the second-place ranking (behind Endocrine Reviews) among 61 endocrinology and metabolism journals studied by ISI using citation analysis. This is an extraordinary achievement for a recently launched publication of peer-reviewed science.

Capture the excitement of topnotch science in the hottest areas of molecular endocrinology. Subscribe now to this exceptional journal.

Subscription Information for 1994
ISSN 0888-8809, Monthly, Vol. 8, Nos. 1-12
Members of The Endocrine Society may select Molecular Endocrinology when renewing their dues, at the member rates of $65.00 U.S., $85.00 elsewhere.
Non-members:
Personal: $140 U.S., $180 elsewhere.
In-training: $90 U.S., $130 elsewhere.
Air service rates on request.

To subscribe, call The Endocrine Society at (301)571-8339.

now is the time

Publishing timely, significant research is nothing new to The Rockefeller University Press journals. They have a history of publishing rigorously reviewed, frequently cited articles that keep up with the evolving fields in biomedical science. Aren’t these the kind of influential journals you need to stay resourceful?

The Journal of Cell Biology
Cell biology from the international community, now published semimonthly. 24 issues. $440 (Europe add $100)
N. B. Gilula, editor.

The Journal of Clinical Investigation
International forum for research that links basic science to medical practice.
12 issues. $275 (Europe add $85)
A. P. Varki, editor.

The Journal of Experimental Medicine
Significant research in immunology and experimental medicine.
12 issues. $225 (Europe add $75)

The Journal of General Physiology
Articles concerned with mechanisms of broad physiological significance, covering prime research for cellular and molecular physiology.
$210 (Europe add $45)
P. F. Cranefield, editor.
