Paper of the Year Award

Each year, Molecular Biology of the Cell sponsors the MBC Paper of the Year Award. The winner of the award is the first author, who must be a student or postdoc of the paper judged by the Editorial Board to be the best among those published from July to June of each year. The winner will then be a speaker in an appropriate minisymposium at the next ASCB Annual Meeting. The award pays travel expenses for the winner to attend the Annual Meeting.

Papers are currently being considered for the fifth MBC Paper of the Year Award, the winner of which will be featured at the ASCB Annual Meeting in San Francisco, California, December 7–11, 1996.

Submit papers to: MBC Managing Editor, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814-3992. Phone: (301) 530-7153; Fax: (301) 571-8304.

Molecular Biology of the Cell (ISSN 1059-1524) is published monthly (one volume per year) by The American Society for Cell Biology, Bethesda, MD 20814, E-mail: mbc@ascb.faseb.org. Subscription prices: $300 for institutions and $150 for non-ASCB members. Second-class postage is paid at Bethesda, MD and at additional mailing offices. POSTMASTER: Send address changes to Molecular Biology of the Cell, ASCB Publications Office, 9650 Rockville Pike, Bethesda, MD 20814-3992. © 1996 by The American Society for Cell Biology. All rights reserved. Reproduction of any portion of this publication is permitted at no charge when use is for educational purposes. MBC is indexed or abstracted in: Biological Abstracts, BIOSIS Data Base, CAB International, CABS, Chemical Abstracts, Current Contents/Life Sciences, Index Medicus, Medline, and Reference Update.

NEUROEXOCYTOSIS

BOTULINUM NEUROTOXINS

Botulinum neurotoxins are single chain ~150 kD proteins which, when activated by proteolysis (nickling), are converted to ~100 kD heavy and ~50 kD light chains connected by disulfide and noncovalent bonds. Pure, unreduced botulinum neurotoxins migrate as a single major band on SDS gels and, following reduction, as two bands corresponding to the heavy and light chains.

Unreduced and reduced preparations of purified botulinum neurotoxin type A from LIST are shown below in lanes 1 and 2, respectively. Lanes 3 and 4 contain comparably loaded unreduced and reduced preparations, respectively, of botulinum neurotoxin type A from our competitors.

We think the photo speaks volumes, but if you require further convincing, please give us a call. LIST also provides purified neurotoxin light and heavy chains, tetanus toxin and tetanus toxoid.
Introducing the Natural Solutions for Cell Separation

LAREX, Inc. Creating Solutions from Renewable Resources

6th International Congress on Cell Biology and the 36th American Society for Cell Biology Annual Meeting
San Francisco, California, USA, December 7–11, 1996

Call for Abstracts are now available. Abstract deadline: June 14, 1996.
Contact the Congress Secretariat for meeting information.
A superb journal for developmental biologists!

High quality research articles and reviews
Excellent printing
Free color plates
100 free reprints
No page charges
Two special issues per year
Electronic publishing ensures fast and reliable publication
High visibility (Current Contents, Index Medicus, etc.)
Reduced subscription prices

EDITORS
Juan Aréchaga, Leioa
Goro Eguchi, Okazaki
Eero Lehtonen, Helsinki
George M. Malacinski, Bloomington

Get to the core of the latest research in cell physiology.

The *American Journal of Physiology: Cell Physiology* presents superior reporting of exciting new scientific findings in the field. It is published by The American Physiological Society, the leading organization covering the full spectrum of physiology. Each year, *AJP: Cell Physiology* brings you approximately 400 articles encompassing 3,500 pages that include:

- **Original, innovative work** about normal and abnormal cell functions of essential interest to physiologists, cell biologists, biochemists, and biophysicists.

- **Thought-provoking, stringently reviewed papers** on the structure and function of cell membranes, contractile systems, and cellular organelles, as well as mechanisms of development, cell-to-cell interaction, gene expression, and neural, endocrine, and metabolic control of physiologically important functions.

- **Relevant research reports from related fields** such as biochemistry, biophysics, molecular biology, cell biology, and immunology.

Plus... Rapid Communications and Invited Reviews in every issue.

**Act now and receive 1996 for the low 1995 rate.**
Subscription prices increase annually. Don't miss this opportunity to save. Send your order in today and receive your new 1996 subscription at 1995 rates.

☐ Yes! I want to stay on top of advances in cell physiology. Please begin my new 1996 subscription to the *American Journal of Physiology: Cell Physiology* at the low 1995 rate noted below.

☐ Also, please send me the 1995 issues for the additional low rate noted below.

Maryland residents add 5% sales tax, or provide tax exempt ID#.
Canadian residents add 7% G.S.T.
All subscriptions must be paid in advance in U.S. dollars. Foreign payments must be made in U.S. dollars, drawn on a U.S. bank located within the continental United States or charged to MasterCard or Visa.

**Send your order or manuscript to:**
The American Physiological Society
9650 Rockville Pike
Bethesda, MD 20814, USA.

☐ Send me information about membership in The American Physiological Society.

**Special Rate:**
- **APS Member:** ☐ $96
- **Non-Member Individual:** ☐ $192 U.S. ☐ $232 Canada & Mexico ☐ $267 Elsewhere
- **Institutions:** ☐ $286 U.S. ☐ $326 Canada & Mexico ☐ $361 Elsewhere

☐ Payment enclosed. ☐ Charge my order to:
- ☐ Visa ☐ MasterCard ☐ Card Number
- ☐ Signature
- Expires Date
