## Articles

- **α-Adaptin, a Marker for Endocytosis, Is Expressed in Complex Patterns during *Drosophila* Development**  
  S. Dornan, A.P. Jackson, and N.J. Gay  
  1391–1403

- **Protein–Protein Interactions in the Synaptonemal Complex**  
  M. Tarsounas, R.E. Pearlman, P.J. Gasser, M.S. Park, and P.B. Moens  
  1405–1414

- **Lysophosphatidic Acid and Microtubule-destabilizing Agents Stimulate Fibronectin Matrix Assembly through Rho-dependent Actin Stress Fiber Formation and Cell Contraction**  
  Q. Zhang, M.K. Magnusson, and D.F. Mosher  
  1415–1425

- **SIC1 Is Ubiquitinated In Vitro by a Pathway that Requires CDC4, CDC34, and Cyclin/CDK Activities**  
  R. Verma, R.M. Renny Feldman, and R.J. Deshaies  
  1427–1437

- **Nuclear Membrane Vesicle Targeting to Chromatin in a *Drosophila* Embryo Cell-Free System**  
  N. Ulitzur, A. Harel, M. Goldberg, N. Feinstein, and Y. Gruenbaum  
  1439–1448

- **Membrane Translocation of Mitochondrially Coded Cox2p: Distinct Requirements for Export of N and C Termini and Dependence on the Conserved Protein Oxa1p**  
  S. He and T.D. Fox  
  1449–1460

- **The Spindle Pole Body of *Schizosaccharomyces pombe* Enters and Leaves the Nuclear Envelope as the Cell Cycle Proceeds**  
  R. Ding, R.R. West, M. Morphew, B.R. Oakley, and J.R. McIntosh  
  1461–1479

- **Yeast Actin Cytoskeleton Mutants Accumulate a New Class of Golgi-derived Secretory Vesicle**  
  J. Mulholland, A. Wesp, H. Riezman, and D. Botstein  
  1481–1499

- **High-Resolution Calcium Mapping of the Endoplasmic Reticulum-Golgi-Exocytic Membrane System**  
  R. Pezziati, M. Bossi, P. Podini, J. Meldolesi, and F. Grohovaz  
  1501–1512

- **Tissue Inhibitor of Metalloproteinases-2 Is Expressed in the Interstitial Matrix in Adult Mouse Organs and during Embryonic Development**  
  L. Blavier and Y.A. DeClerck  
  1513–1527

**MBC: What We're About**

At *Molecular Biology of the Cell*, we consider the reporting of science to be an integral part of research itself—a critical tool that properly belongs in the hands of scientists. We believe that journals should be transparent—imposing no requirements for “level of excitement,” setting no trends, enforcing no arbitrary length restrictions. Rather, *MBC* seeks to facilitate communication among scientists by expecting full documentation of Methods and Results, by encouraging Introductions and Discussions that frame questions and interpret findings clearly (even for those outside an immediate circle of experts), and by advocating the interests of both contributors and readers through fair, prompt, and thorough review, coupled with responsible editorial adjudication and thoughtful suggestions for revision and clarification.
# Table of Contents

A Sorting Nexin-1 Homologue, Vps5p, Forms a Complex with Vps17p and Is Required for Recycling the Vacuolar Protein-sorting Receptor  

Three Determinants in Ezrin Are Responsible for Cell Extension Activity  

Complexes between Nascent Polypeptides and Their Molecular Chaperones in the Cytosol of Mammalian Cells  
D.K. Eggers, W.J. Welch, and W.J. Hansen ................................................................................................. 1559–1573

A Role for the SHP-2 Tyrosine Phosphatase in Nerve Growth Factor-induced PC12 Cell Differentiation  

Mcm2 and Mcm3 Are Constitutive Nuclear Proteins That Exhibit Distinct Isoforms and Bind Chromatin during Specific Cell Cycle Stages of *Saccharomyces cerevisiae*  
M.R. Young and B.K. Tye ......................................................................................................................... 1587–1601

Regulated Nuclear Translocation of the Mig1 Glucose Repressor  
M.J. DeVit, J.A. Waddle, and M. Johnston ................................................................................................. 1603–1618

The Carboxyl-Terminal Valine Residues of ProTGFα Are Required for Its Efficient Maturation and Intracellular Routing  

A Dependent Pathway of Cytoplasmic Polyadenylation Reactions Linked to Cell Cycle Control by c-mos and CDK1 Activation  
S. Ballantyne, D.L. Daniel, Jr., and M. Wickens ......................................................................................... 1633–1648
